

Updated Modules available for SHIP in 2016

Appointment auto tick box:

Continually updates appointments booked, as the time changes the sheet will automatically update and display the appointment boxes for that block of time.

Staff Reminders: Outstanding Staff reminders for a Client, will turn **(Staff Reminder) red** in Registration and Services.

Contact Tracing: Import from Past sex history update allows the User to include or exclude contacts in the list. **Work list:** Allows you to search by specific diagnosis and Status.

Data Integrity: In clinic codes set up Minimum dataset applicable to your clinic, then set up the Data Integrity check.

Recalls on the Client Services

module – Main Recall: Enter the Recall date, the list of Recalls for the selected client will display. In this form edit the date or Recall reason if required.

Examination (Female, Male) Enter data using tick boxes and free text in comments box to describe an abnormal examination.

Clinical Notes: Customize Clinical notes, change the font, use bold, underline and highlight text in the Clinical Note. (This functionality available for those clinics using Access 2010).

Letter Commands: (for Clinics in Access 2007) new options available. Export to word and save as a PDF in Document tracker.

SHIP Reports, there are over 200 reports including Adhoc reporting allowing users to create queries and reports on Clinic data as and when they require.

Specialised Health Information Program

SHIP

Newsletter update for December 2015

This Christmas season, we hope everyone is going to have a relaxing break and spend some quality time with family and friends.

CaraData will be back in the New Year to continue supporting you. We would like to thank you for your valuable input.

What we have been doing in 2015

The CaraData team have had a busy year with many Clinic upgrades, installations and improvements to SHIP including extensive testing.

Updating the SHIP HELP: The HELP has been an ongoing project, keeping up with updates. Each module links to **SHIP Help** giving instructions on how to enter the data. To display the HELP Click on the red question mark **?**

Other Projects we have been involved in are the ACCESS project this is now published in the Kirby Institute Annual Surveillance Report. AHOD (Australian HIV Observational Database) exporting the data from Clinics in Australia, and providing support to clinics and submitting the end reports for both the ACCESS and the AHOD projects.

We have also been working with GRHANITE Health Informatics Unit. GRHANITE HIU provides researchers, managers and health professionals to collect data for the purposes of audit, clinical research and health surveillance.

Don't forget if you haven't installed the **Pathology and SMS interface** please contact us for a quotation to have these programs integrated within SHIP.

Pathology Interface: for downloading requests, pathology results from Laboratories.

SHIP SMS and Appointment booking: Text results, appointment and treatment reminders, integrate with the text appointment booking.

Appointment Triage: Appointment booking system via the clinic website.

For further product information on the updates, interfaces please contact us at
